FOREWORD

Effective January 1, 1985, all SCCA National PRO Rally rules are superseded by the following SCCA National PRO Rally Rules.

The SCCA reserves the right to revise these Rules, to issue supplements to them at any time, and promulgate special rules in emergencies.

Questions concerning Rules clarifications should be addressed to:

PRO Rally Office
Sports Car Club of America, Inc.
6750 South Emporia Street
P.O. Box 3278
Englewood, Colorado 80155

Portions of these Rules differing significantly from previous editions are denoted by a solid black bar in the left hand margin next to the line(s) which have been added, omitted or changed. An example of this "change bar" is at left.

1985 SCCA
NATIONAL PRO RALLY RULES

1. PURPOSE

The purpose of the Sports Car Club of America, Inc. (SCCA) National PRO Rally Championship Series is to encourage participation in and support of, on a national basis, rallies offering a driving challenge. The rallies in this series will follow a format as closely as possible as those counting toward the Federation Internationale de l'Automobile (FIA) International Rally Championship for Makes. However, safety and state regulations will be of key importance in competing in, and staging of, these events.

2. ADMINISTRATION

2.1 SCCA PRO Rally Office

A. The SCCA PRO Rally Office shall be responsible for the development of rules and standards for the conduct of National Pro Rallies and shall establish, supervise and administer an annual program of events. The SCCA PRO Rally Office consists of the SCCA PRO Rally Adminstrator and the SCCA National Pro Rally Series Chief Steward. The SCCA PRO Rally Office shall have final authority on rules and standards of conduct for the National PRO Rally Series.

2.2 SCCA PRO Rally Administrator

A. The SCCA PRO Rally Administrator shall establish and administer the National Series and the annual program of events.

B. The SCCA PRO Rally Administrator shall seek the advice of the PRO Rally Board on any changes within the National PRO Rally Series that may have an impact on the efforts of the board.

2.3 SCCA PRO Rally Series Chief Steward

A. The SCCA PRO Rally Series Chief Steward shall be responsible for the development of rules and standards for the conduct of National PRO Rallies.

B. The SCCA PRO Rally Series Chief Steward shall have final authority on conduct of events and enforcement of rules and standards except at those events where, in accordance with FISA regulations, SCCA appoints one or more stewards of the meeting, in which case the PRO Rally Series Chief Steward becomes Clerk of the Course.

C. The SCCA PRO Rally Series Chief Steward shall have the authority to delegate duties and appoint such personnel as may be required to affect the purposes of the National PRO Rally Series.

D. The SCCA PRO Rally Series Chief Steward will seek the advice of the PRO Rally Board on any proposed rule changes and additionally, on any other changes in the National PRO Rally Series that may have an impact on the efforts of the Board.

2.4 SCCA PRO Rally Board

The PRO Rally Board shall be responsible for the establishment and development of Divisional PRO RALLY programs. To this end, Divisional PRO Rally Stewards shall be appointed by the PRO Rally Board in each SCCA Division, subject to the approval of the Director(s) of the Division, for the purpose of coordinating and administering these Divisional PRO Rally programs.

3. SCCA PRO RALLY SERIES

The SCCA National PRO Rally Championship Series will be comprised of not more than ten (10) events in any one calendar year. In order to be eligible for inclusion in the SCCA National PRO Rally Championship Series, a proposed event must meet the requirements of the SCCA PRO Rally Rules for Organizers and be sanctioned by the SCCA PRO Rally Office.

4. PRO RALLY RULES AND RULES FOR ORGANIZERS

4.1 Rules

These Rules shall govern all SCCA National PRO Rallies.

4.2 Rules for Organizers

Rules for Organizers (RFOs) of SCCA National PRO Rallies shall be available to all event organizers. The RFOs shall guide the organizer in the preparation and conduct of the event. Organizers are responsible to the PRO Rally Series Chief Steward for adherence to the RFOs. The Rules for Organizers shall not serve as a basis for claim by the contestants.

4.3 Revision of PRO Rally Rules for Organizers

The PRO Rally Office reserves the right to make such changes in these Rules, Rules for Organizers, and appendices as may be deemed necessary or advisable.

5. ACCEPTANCE OF REGULATIONS AND RULES

5.1 By the Rally Committee

Each rally committee that undertakes to organize an SCCA National PRO Rally shall be acquainted with these Rules and with the Rules for Organizers and shall be bound by them.

5.2 By the Competitor

Each participant in an SCCA National PRO Rally shall be familiar with and bound by these Rules. Participation by a contestant shall constitute evidence of that contestant's acceptance of this provision.

6. INSURANCE

6.1 Event Insurance Requirement

SCCA requires that all PRO Rally events sanctioned by the SCCA will be insured for coverage of event liability and participant accident in coverage and amounts in compliance with the SCCA Master Insurance Plan. Participant

accident insurance will be provided by the SCCA Master Insurance Plan. Event liability insurance may be provided by the SCCA Master Insurance Plan or an equivalent policy provided that it is in compliance with the procedures described in 6.3. (Alternative Event Liability Insurance).

6.2 Coverage and Limits

SCCA requires that all events be covered by the following forms of insurance for the minimum limits shown:

A. EVENT LIABILITY (including contingent, products, and cross liability) for bodily injury and property damage: $1,000,000 per occurrence Combined Single Limit—TO BE PROVIDED BY THE SCCA MASTER INSURANCE PLAN OR EQUIVALENT POLICY.

B. PARTICIPANT ACCIDENT—WILL BE OBTAINED FOR THE EVENT BY THE SCCA PRO RALLY OFFICE THROUGH THE SCCA MASTER INSURANCE PLAN.

Accident Death & Dismemberment	$10,000
Blanket Medical Reimbursement	$10,000
Weekly Indemnity up to 104 weeks (excess of 7 days)	$ 75

6.3 Alternative Event Liability Insurance

The organizers and/or promoters of an SCCA sanctioned PRO Rally event which is to be insured with liability coverage other than that provided by the current SCCA Master Insurance Plan shall adhere to the following:

A. Any insuror providing all or part of the event liability insurance shall carry at Best's Insurance rating of at least A12.

B. A fully worded and identified LIABILITY policy (or policies) of insurance will be forwarded to members of the National Insurance committee so that receipt of the LIABILITY policy (or policies) will occur not less than thirty (30) days prior to the scheduled commencement of the event TO BE INSURED BY SUCH LIABILITY POLICY (OR POLICIES).

C. If such fully worded and identified LIABILITY policy (or policies) is not received by the SCCA President by a date thirty (30) days prior to the scheduled commencement of the event to be insured, the President shall cause the event to be insured for liability under the current SCCA Master Insurance Plan. Certificates evidencing such LIABILITY coverage and billing for the appropriate premium charge, therefore, shall be sent to the event organizers and promoters. In the case that the premium charge is unpaid by a date fourteen (14) days prior to the scheduled commencement of the event, the president shall cause the event to be cancelled.

7. ENTRY REQUIREMENTS

7.1 Entry Blank

Application for entry in an SCCA National PRO Rally shall be made by means of the official entry form approved by the PRO Rally Office. Forms are available from the SCCA Rally Department. The form shall contain or be accompanied by full instructions for its submission which shall mention the date of closing of entries. An entry blank for each rally should be sent to all PRO Rally license holders. The current mailing list is available from the SCCA PRO Rally Department.

Submission of incorrect information on the event entry form will result in forfeiture of competitor's or entrant's rights within these rules, forfeiture of prize funds and forfeiture of championship points earned on the subject event.

7.2 Number of Contestants per Crew

Each car participating in an SCCA National PRO Rally shall have two and only two occupants. Substituting, for any reason, another person or vehicle after starting the event shall result in a score of DNF (Did Not Finish) for the car and its crewmembers.

7.3 Driver's Licenses and Competitor's Licenses

All competitors must be at least 18 years of age and must hold a valid automobile operator's license for the state in which they reside. A learner's permit shall not constitute a valid license.

All competitors in an SCCA National PRO Rally must hold the following licenses, which must be currently valid and available for inspection during the events:

A. FIA Driver's License at FIA-listed events
B. SCCA National PRO Rally License

For citizens of the United States, these licenses are available to SCCA members *only* through the SCCA National Office. NO LICENSES WILL BE SOLD AT SCCA NATIONAL PRO RALLY EVENTS.

All competitors applying for their initial National PRO Rally license are required to have completed a Divisional PRO Rally or attended a recognized PRO Rally School.

FIA-Rally Only licenses will be issued only to current SCCA National PRO Rally license holders. All competitors applying for their initial FIA-Rally Only License must have completed a National PRO Rally. A current FIA license and a current SCCA National license are required for FIA listed events.

Application forms for licenses are available from the Rally Department. Such licenses will be issued by the SCCA Rally Department upon receipt of a properly completed application form and payment of appropriate fees.

7.4 Competition by Non-Members

Non-U.S. citizens who hold valid FIA licenses may enter and participate in an SCCA National PRO Rally. Such competitors may be eligible to win money and receive awards, but are ineligible for National PRO Rally Championship points.

7.5 Vehicle Registration

As evidence that the car entered is on the road legally and is either owned by the entrant or is being used by the entrant with the permission of the owner, the car registration cerificate or the certificate of ownership must be available for inspection by officials before the start of the rally and at any time during its progress.

7.6 Vehicle Eligibility

A. Open Class—It is the intent of these rules that vehicles competing in the Open Class be based on production vehicles. Innovation and modification within the rules is not discouraged. 'One-off' vehicles built from the ground up are explicitly prohibited. Eligibility is restricted to street-licensed, closed bodied four-wheel vehicles. Fabric tops and side panels are prohibited. This includes rally cars homologated under FIA 'Appendix J' rules (i.e. former Group 1, 2, 3, and 4 and current groups N, A and B) plus non-homologated meeting the following requirements:

1. The vehicle must be based on a model built by a recognized manufacturer listed in the NADA Official Used Car Guide.
2. The engine is free, must be derived from product line offered by the manufacturer of the vehicle.
3. Brakes and suspension are free.
4. Exterior body pieces (i.e. all components licked by the air stream, excluding the belly pan) must be identcal in appearance to the original item. This includes bumpers. Except for doors, bolt-on-body pieces may be constructed of an alternate material. The original window glazing material can only be replaced with identical material (e.g. glass can only be replaced with glass).
5. Fender flares and spoilers are free.
6. Wheel diameter and width are free but the tire must be fully covered by the body and fenders flares.

In addition, non-homologated vehicles may use parts from their homologated versions if the appropriate documentation is provided by the entrant; and homologated vehicles may be modified within the above limits.

B. Standard Production and Production GT Classes—All street-licensed, closed-body, four-wheel vehicles listed on the Eligible Vehicles List compiled by the PRO Rally Series Chief Steward and available from the SCCA Rally Department. All vehicles entered in either one of these two production classes must also comply with Appendix A to these Rules.

C. Group A—Cars competing in this category must meet the strict requirements of The Sporting Code Appendix J and Article 225--Specific Regulations for Group A in The Federation Internationale de l' Automobile year book, as referenced in Appendix "B" to these Rules.

7.7 Liability Releases

All entrants, service crew members, rally committee members, worker and all persons engaged in pre-event vehicle activities (such as Press Stages) on an SCCA National PRO Rally must sign a waiver, prior to the start of the activity, in such form as may be prescribed by the PRO Rally Office and/or the rally committee, releasing all parties designated in the waiver from any and all liability of any nature whatsoever in connection with the event.

7.8 Vehicle Identification

All competing vehicles in an SCCA International or National PRO Rally are required to carry an "SCCA" and "PRO RALLY" decal, along with their appropriate car number, on both doors of the vehicle. The decal and car numbers used must be those provided by SCCA and may not be cut-out from their background. These decals and car numbers must be placed on the vehicle as shown in the diagrams given in Appendix I to these Rules.

Numbers may be painted on the car if the SCCA PRO Rally Department has assigned a permanent number for an entire season. Application for permanent numbers may be made to the SCCA PRO Rally Department and assigned numbers must be placed on the car as directed by the PRO Rally Department. Numbers will be issued on a first come first served basis with priority for each number belonging to the driver who finished in that position overall in the previous season championship. Priority will expire 30 days from the date set by the SCCA PRO Rally Department.

All competing vehicles are also required to display one 8-inch diameter wire wheel decal in a visible location on each side on the vehicles.

All vehicles competing in the Production, Production GT, or Group A classes will be so designated by the placement of a decal containing the letter (s) "P" (in the case of Production), "GT" (in the cases of Production GT), or "A" (in the case of Group A) following the car's number on each door of the vehicle.

The names and blood types of both the Driver and Co-Driver must appear on the vehicle in accordance with Appendix I to these Rules. The name must include at least the first initial and the entire last name of each team member in contrasting letters at least 1½" high.

The public visibility of the sport of PRO Rally requires that all car numbers be removed or covered on any competition vehicle being driven on public roads not competing in SCCA National PRO Rally. Violators will be disciplined per Section 15 (Conduct) of these Rules.

7.9 Commercial Advertising

All competing vehicles in an SCCA National PRO Rally may be required to carry event sponsor advertising supplied by the organizers.

Commercial advertising in good taste is allowed on any vehicle.

7.10 Refusal of Entry

SCCA reserves the right to bar any member or non-member from participating in the SCCA National PRO Rally series. An organizer shall have the authority to accept or reject any entry. If an entry is refused, notification of such refusal shall be sent to the entrant at the address given on the entry form as soon as possible.

8. ENTRY FEES

Entry fees are to be set by the conducting Region and stated in the event's general announcement.

9. SCRUTINEERING

Each vehicle entered in an SCCA National PRO Rally shall be required to pass a safety inspection within the 24-hour period immediately preceding the start of the event at a suitable location designated by the organizer. This safety inspection must be conducted under the direction of a currently-licensed SCCA Scrutineer or a holder of a current SCCA Scrutineering Log Book. Scrutineers shall conduct the safety inspection in accordance with the standards prescribed by the organizer and the SCCA PRO Rally Series Chief Steward.

Items to be checked, in addition to items A-L, will be spelled out in the event's Supplementary Regulations. The entrant of any vehicle initially failing to meet the requirements listed in A-L and/or the event's Supplementary Regulations shall be given reasonable opportunity to remedy the deficiency and to resubmit the car for inspection as the organizer may direct.

Any obvious illegalities in vehicle preparation and/or eligibility for the class entered noted during scrutineering shall be reported by the Chief Scrutineer to the SCCA PRO Rally Series Chief Steward who will adjudicate the situation. Vehicles that do not meet the safety requirements will not be allowed to start. Vehicles that do not meet the regulations for the class entered may choose to run in the appropriate

class. Vehicles may be subject to further inspection at any time during the course of the event by a rally official. Vehicles found to be unsafe will be barred from further competition.

All vehicles must be presented in a neat and clean condition with no body damage or primer apparent. All SCCA required and event organizer required decals must be in place.

9.1 Minimum Requirements

The following vehicle equipment shall be operable and in a safe condition:

A. Headlights (high and low beams), parking lights and auxiliary driving lights. The base of any auxiliary driving light may not be higher than the lowest point of the front windshield. It must be possible to extinguish all forwad-facing driving lights and dip to low beam all headlights by the use of a single switch.
B. Taillights and stoplights
C. Horn, windshield wipers and directional signals
D. Rear-view mirror
E. Footbrakes (to be subjected to a moving brake test) and parking brake (to be tested for holding ability)
F. Tires, including spare, to be ispected for condition of sidewalls as well as tread and for absence of metal protruding from tread. Studded tires and similar tires containing metal protruding from the tread area are prohibited.
G. Mud flaps on all drive and rear wheels.
H. Roll cage meeting current SCCA or FIA specifications. SCCA specifications are listed in Appendix Z to these rules. Contestants wishing to build a roll cage to FIA specifications must provide evidence of compliance with those specifications at all PRO Rally safety inspections.
I. All vehicles must be equipped with, and all competitors must use, occupant restraint systems as specified in Appendix Y of these Rules.
J. A laminated safety glass front windshield.

K. Battery: If the battery is located in the driver/co-driver compartment or the compartment containing the fuel tank, it must be in a leakproof container or equipped with leakproof caps and enclosed in a nonconductive "marine type" box. The hot terminal must be insulated on all cars. All batteries shall be securely attached to the primary structure of the vehicle.

L. Hoods must be fixed closed with hood pins accessible from the outside. Other fastening devices, inside or out, must be rendered inoperative.

M. Other items necessary to insure a safe vehicle, such as properly adjusted wheel bearings, absence of fuel leaks, secureness of battery, seats and equipment in passenger compartment, etc.

In addition, each car must have aboard, in an accessible location the following items of safety equipment:

A. First-aid kit (Johnson & Johnson Auto First Aid Kit or equivalent). It is *recommended* that all competitors in SCCA PRO Rallies complete a Red Cross Multi-media First Aid Course and a cardiopulmonary resuscitation course.

B. Minimum of *either* ten (10) 15-minute road flares and one (1) D.O.T. reflective triangle *or* three (3) D.O.T. reflective triangles. A requirement for D.O.T. reflective triangles ONLY as a substitute for flares may be imposed by organizers running in areas where local conditions prohibit the use of flares.

C. Dry chemical or Halon (1301 or 1211) fire extinguisher of at least 10 B:C rating or equivalent (combined total in one or more units). Dry chemical extinguishers must bear certification that they have been serviced during the six month period prior to the event.

D. Tow rope.

9.2 Fuel Containers

No gasoline other than that carried in the fuel tanks shall be carried in any vehicle. No fuel tanks, except SCCA approved fuel cells, may be fitted in, or encroach upon, the passenger compartment. If conventional fuel tanks are fitted in the luggage compartment, there must be a fireproof bulkhead separating that compartment from the driver/co-driver compartment. All fuel tanks must be securely mounted to the primary structure of the vehicle. Note: fuel cell specifications are contained in the SCCA General Competition Rules. Fuel pumps shall be isolated from the driver/co-driver by a fireproof metal bulkhead. Any nonstandard fuel line located in the passenger compartment shall be of a metal-braided (aeroquip) construction.

9.3 Power Windows

Electrically operated windows are prohibited and must be replaced with manually operated mechanisms provided by the vehicle manufacturer or a like installation approved by the SCCA PRO Rally Series Chief Steward.

9.4 Power Door Locks

Power door locks are prohibited and must be replaced with manually operated mechanisms provided by the vehicle manufacturer or like installation approved by the SCCA PRO Rally Series Chief Steward.

9.5 Sunroofs and/or Roof Panels

Movable metal sunroofs and/or roof panels must be fixed in the closed position. Glass or plastic sunroofs and/or roof panels are not allowed. Glass or plastic sunroofs and/or roof panels must be replaced with metal and must be fixed in the closed position. The finished work must be of equal or greater strength than the permanent roof.

9.6 Noise Check

It is recommended that a noise check be conducted at each event. If a noise check is conducted, the maximum allowable level cannot exceed 86 dba. The noise check will be conducted in the following manner, with the dba meter 50 feet

from the left side of the vehicle: The vehicle shall be in a stationary position. Run the engine up to 4000 rpm, momentarily hold at 4000 rpm and close throttle return to idle. Measurements are to be determined using the "fast response" setting on a suitably calibrated sound meter.

9.7 Helmets

Safety helmets for both driver and co-driver must conform to 1975 or later Snell Safety standards. The back of each helmet must be labeled in a neat manner with the following information about its wearer: Name, date of birth, blood type, allergies, date of most recent tetanus immunization, and other pertinent medical history (i.e., diabetes, etc.) Helmets that do not pass scrutineering will be confiscated and returned after the event.

9.8 Driving Suits

Driving suits, complete with identification per Appendix I of these Rules, must be available at Scrutineering and worn by both drivers during the event.

10. VEHICLE LOG BOOK

A standard SCCA Vehicle Log Book shall be used by all competitors at all SCCA PRO Rallies.

Only one log book will be issued for each vehicle (other than by way of extension or replacement) and the possession of two log books for one vehicle at one time shall be deemed a violation of these Rules.

The log book shall be issued by the Regional Executive or his designated representative. Each vehicle will have an identity number corresponding to that of its log book permanently stamped on its roll cage.

The first digit(s) corresponding to the Region's identity number shall be separated from the balance of the numbers by a dash(-). The vehicle number system beginning with the (001) shall be issued consecutively as the vehicles are registered during a thorough inspection.

A complete description of the vehicle, its safety roll cage and the required photographs will be entered in the places provided. All changes of ownership of the vehicle must be recorded as provided.

At each event, the log book must be presented at Scrutineering with the signature of the driver/entrant for that event in the space provided. During Scrutineering all deviations regarding both safety and legality will be noted by the Scrutineer. If a waiver for the event is permitted the duration of the waiver must be noted and complied with by the competitor.

If a car is protested during an event, the results of this protest must be noted.

Log books must remain with the vehicle at all times and be available to be presented to a rally official on demand.

CASC Vehicle History Log Books are to be accepted at all SCCA events.

11. SUPPLEMENTARY REGULATIONS

Each SCCA National PRO Rally shall have supplementary regulations covering areas *NOT* specified in these Rules and adding to rules contained herein.

The supplementary regulations for an SCCA National PRO Rally shall include information such as schedules, local maps, local laws concerning vehicle preparation, (i.e. headlights and bumpers) awards, etc. They shall also contain a glossary of terms used in the event.

Except in cases where specific sanction "exception" has been granted by the PRO Rally office, supplementary regulations may not alter or contradict National PRO Rally Rules. If such contradictions occur, the National PRO Rally Rules shall take precedence over the supplementary regulations.

Supplementary regulations shall be mailed by first class mail to all entered drivers and co-drivers, a minimum of 15 days prior to the event.

12. THE EVENT

In order for an event to be eligible for National PRO Rally series sanction, it must meet the following standards:

12.1 Description

The PRO Rally Office requires that events in the National PRO Rally Championship series follow a stage rally format. The stage format is a series of driver's sections connected by a series of low speed transit runs.

12.2 Speeds

Maximum speed assigned to any transit section will be at least 10 percent under the maximum legal limit of the state through which the rally runs.

Any stage road on which traffic will be controlled for the duration of the rally will have a zero target time assigned for scoring purposes.

12.3 Length

The minimum overall length of a National PRO Rally is 250 miles. There must be a minimum of 100 miles of stages.

If more than 50% of the stage miles published in an event's Route Book are cancelled, the PRO Rally Series Chief Steward will determine whether or not that event will be included in the National PRO Rally Championship points standings for the year.

12.4 Starting Order

The starting order for entrants on all National PRO Rally events must be determined by a seeded draw using the seven mandatory seed groups listed below. Competitors must enter and compete in the highest seed group for which their qualifications make them eligible. Production and Production GT drivers are to be included in their proper seed group for the purpose of drawing starting positions. FIA, Seed 1 and Seed 2 Production and Production GT drivers will be placed at the end of Seed 2 in the order drawn. Group A cars are to be included in the overall draw. The time, place and method of draw must be stated in the event's supplementary

regulations. A listing of all competitors qualified for Seeds FIA 1, 2, 3, and 4 will be provided to each organizing committee by the SCCA Rally Department. Re-starts that include a new starting order must not occur before 20% of the published stage miles have been completed. Re-seed within seed groups is not allowed. The SCCA PRO Rally Series Chief Steward may change the order for safety reasons.

The mandatory seed groups and qualifications therefore are:

Seed FIA– FIA International seeded drivers. First and second seeded FIA drivers will be combined unless FIA first seed drivers with foreign licenses, except Canada, are entered in the event. Then, first and second seeded drivers will be drawn separately.

Seed 1— Based on the November 15 seeding list, 40% (rounded upwards) of the combined total of drivers qualified for Seeds 1 and 2 will be elevated to Seed 1 until the following November 15 seeding list is issued.

The seed point total of the lowest person elevated to Seed 1, based on the November 15 seeding list, will be the entry level point total for Seed 1 until the following November 15 seeding list is issued.

Seed 2— Drivers having accumulated 20 or more seeding points.

All drivers, who have at one time or another, attained FIA or Seed 1 status, shall permanently be seeded no lower than Seed 2 at any future SCCA National PRO Rally.

Seed 3— Drivers having finished two times in the top ten places on an event for which seeding points are awarded, during the 24 month period immediately preceding seeding.

Seed 4— Drivers having finished two times in the top fifteen places on an event for which seeding points are awarded, during the 24 month period immediately preceding seeding.

Seed 5— Drivers having finished an event for which seeding points are awarded.

Seed 6— All other drivers. All Seed 6 competitors must attend a mandatory Steward's Briefing prior to the start of any SCCA National PRO Rally event in which they are entered.

For Seeds 1 and 2 only, a drivers' best five finishes in the 36 month period immediately preceding seeding will be counted. There is no time limit for qualification for Seeds 5 and 6.

Drivers earn seeding points by finishing in the top ten overall positions on any FIA listed rally or on any SCCA National PRO Rally. Points for each finish position are awarded on the same basis as the SCCA National PRO Rally Championship Series. (i.e., 1st—20 points, 2nd—15 points, etc.)

U.S. Residents must be current members of SCCA to be placed in FIA, Seed 1 or Seed 2 of the Seeded Drivers List. Non- FIA seed foreign competitors must submit seeding requests and supporting information of qualifications to the event organizer to assure proper seeding. In the absence of such information, the foreign competitor will be placed in a seed group at the discretion of the event organizer and Series Chief Steward.

The list for Seeds 1 and 2 will be updated on November 15, February 15, May 15, and August 15. These revisions will apply to PRO Rallies run in the first, second, third and fourth quarters of the year, respectively. Seeding positions can be bettered, but not reduced, during the calendar year.

12.5 Route Book

A. All National PRO Rally events must use the standard Route Book format as described in the current PRO Rally Rules for Organizers:
   1. Top Information Area: Contains all information pertaining to the total length and time allowance for each transit and stage, and other information as indicated (start and finish point of tansit, title of stage, etc.)
   2. Page Columns (reading from the left margin):
      Column 1— Numerical line reference number, beginning at the number "1" for each transit and each stage.
      Column 2— Overall accumulative official mileage from the start of the rally or the last point at which mileage was zeroed.
      Column 3— Interval mileage from the preceding instruction.
      Column 4— A map diagram (tulip or alpine) showing the correct route at all instructed intersections.
      Column 5— Other information as appropriate (hazard warnings, confirming signs landmarks and special instructions may be included here).
      Column 6— Decreasing remaining mileage from each instruction to the end of the transit or stage.
   3. Bottom Information Area: Gives the mileage to the next instruction of the following page.

B. Mileage to the nearest 0.01 mile shall be given at each action point (every instruction) exactly describing the route. Where appropriate, further confirming instruction shall be given at all action points. The object of the National PRO Rally Series is to offer driver challenge—course following is to be as easy as possible.

C. Course arrows, although highly recommended, as supplemental to the Route Book and shall not be the basis for a claim. In case of of a conflict between the arrows and route book, the route book will prevail.

12.6 Practice and Pace Notes

Route instructions shall not be issued so far in advance as to permit any competitor to practice any part of the route except the odometer check. All competitors shall be given their instructions an equal amount of time before they are due to start the portion of the rally to which they apply.

Practicing in the area of an event shall be banned for a period of 90 days prior to each National PRO Rally. The penalty for violation of this regulation shall be a mandatory one year suspension of the competitor's FIA and/or National PRO Rally License(s).

Practicing is defined to be reconnaissance of the rally route in any vehicle, whether driver or passenger.

Pace notes shall be banned on National PRO Rallies and each event shall be required to conduct at least one control to check for the presence of pace notes in competing cars. The penalty for violation of this regulation by competitors, upon finding pace notes in their car, shall be a mandatory six-month suspension of their FIA and/or National PRO Rally Licenses(s).

Pace Notes are defined as notes on the route prepared in advance. Notes prepared during competition are not considered Pace Notes.

12.7 Stages

The definition of a stage and its regulations are given below:

A. The stage must be identified in the route instructions, with mileage for the start and finish control.
B. Competitors shall be allowed to start the stage at the 00 second mark of their Time Out Minute.
C. Competitors must start the stage on separate minutes.

D. All intersections within a stage shall be controlled by a marshall (as regards roads intended for public travel) and/or a barrier with appropriate warning signs (as regards minor off-road trails).

E. There shall be no habitation within the stage unless the occupants consent.

F. The road chosen as the stage shall be of such a nature that it is virtually impossible to sustain a speed in excess of legal maximum speed and shall be suitably marked to prevent incorrect course.

G. During stages, both driver and co-driver must properly wear the helmets and driving suits inspected at Scrutineering (Article 9.J).

H. The occupant restraint system required in Article 9.K of the Rules must be worn at all times during the event.

I. Windows in the driver and co-driver doors must be rolled-up during stages. Window safety nets may be used in lieu of having windows rolled-up during stages. (See Appendix Y, Proper Window Net Installation)

J. A *confirmed* encounter with moving non-rally traffic on a stage shall be grounds for protest or automatic action by the Series Chief Steward to delete the stage from final event scoring.

K. Competitors may not drive a stage road in the opposite direction of the rally route while the stage is open for competitors.

12.8 Controls

A. All Controls must be noted in the route book, except Observation Controls which must not be referenced in the route book.

B. All National PRO Rally events must use four control types as defined below:

1. Main Time Controls

   Must be used at the start and finish of the rally and at all locations where a time-of-day restart is given. There are two types:

a. An Out Main Time Control is used to start each section. Contestants approach the control in the minute preceding their out minute and are given their timing sticker at the exact out time. The timing sticker contains an out time but no in time.
b. An In Main Time Control is used to end each section. Contestants may arrive early and request the correct time. The control crew will give the contestants any minute requested if that minute has not already passed. The timing sticker contains an in time, but no out time.

2. Start Controls
Must be used at the start of each special stage. Contestants must have a proper minute to arrive at these controls from an out time given at the preceding Main Time Control, Finish Control or Route Control. Although contestants may stop within sight of these controls, they must be timed in when they cross the timing line of such a control. Such in times will be scored to the minute; however, it is recommended that times still be given to the second to aid in resolving timing disputes at the end of the event. All Start Controls must give not only an in time, but also an out time at which the contestant will be started on the stage. This out time must be two minutes after the in minute unless this would result in two or more cars being given the same out minute. In such cases, the second car would be given three minutes and so on. Provisions must be made for co-drivers to walk up to the control to get their in time when any situation occurs that blocks the control and prevents competitors from driving across the timing line.
3. Finish Controls
Must be used at the finish of each special stage. Contestants must be time to the second as they cross the timing line and then have adequate distance to

stop safely at the timing car. The control must be laid out and staffed in such a way that contestants do not have to leave their cars in order to get their timing stickers. All contestants must be given an out time from the control that is two minutes after their in minute unless this would result in two or more cars being given the same out time. In such cases, the second car would be given three minutes and so on. Cars should depart finish controls as rapidly as possible to avoid possible injury from a fast approaching car.

4. Observation Controls
   Must be used to check for contestant violations of state laws (especially speeding) in transit sections, contestant's use of "pace notes" in special stages and other violations of regulations. When used to check for speeding violations, the contestants may be timed over a known distance from the preceding control; however, the use of radar is to be preferred if available. When used to check for "pace notes," it should be located coincident with a Start or Finish Control. In any event, some type of sticker must be given out at all Observation Controls to verify the contestants' passage.

   Each event shall have at least one Observation Control for the purpose of determining if competitors' cars are adhering to state motor vehicle codes. At least one additional Observation Control must be provided to check for the presence of pace notes in competing cars. Competing cars determined to have violated these Rules shall be disqualified.

C. Route Controls are optional for National PRO Rally events, but may be used without a sanction exception being required. This type of control is located within a transit section and effectively divides the transit section into two parts. Its purpose is to control service time and

contestant speeding in transit sections containing a service area. Route Controls should time all contestants in to the second (although only the minute will be scored) and assign out times that will normally be two minutes after the in minute.

D. All events in the National PRO Rally Series will use the following control signs, located as described below:

No. 1 At start controls: Placed some distance before the "clock" location. Signifies the start of the control zone and the actual in timing line.
At main time controls—in: Placed some distance before the control vehicle location. Signifies the start of the control zone.
At observation controls: Placed some distance before the control vehicle. Signifies the start of the control zone and the actual in timing line if an observation control timing system is in use.

No. 2 At all controls: Placed at the location where timing entries will be issued, usually the site of the control vehicle.

No. 3 At start controls only: Placed at the exact starting line for the stage.

No. 4 At finish controls only: Placed at the exact flying finishing for the stage.

No. 5 At Start controls: Placed some distance past the No. 3 sign to signify the end of the Control Zone.
At finish controls: Placed some distance after the clock location, to signify the end of the control zone.
Use of this same sign to define the end of the control zone, is optional at main time and observation control sites.

E. No other types of controls may be used.
F. Competitors must stop at all controls, in the order designated in the route book, and have their time recorded.
G. Each control shall be equipped with at least two accurate time pieces.
H. Control zones are defined as follows:
Start Control: Beginning with the Gate Sign and ending with the Cross Bar.
Finish Control: Beginning with the Flying Finish Sign and ending with the Cross Bar Sign.
Main Time,
Observation,
and Route
Controls: Beginning with the Cross Bar Sign and extending 100 yards past the Clock sign.
A Control Zone is considered a Parc-Perme and no repairs, including tire changes, may take place within the Control Zone. Competitors will be considered to be in the Control Zone the moment they check into the Control, whether or not the car is within the physical boundaries of the Control Zone.
I. Should a Control NOT be in place during an event, the elapsed time to the next control that is in place will be the sum of the Transit Times and the Stage Lateness Times (Bogey Times) listed in the Route Book.
J. Should a blockage occur at a Start or Main Time Control and the competing crew is unable to reach the timing

line with their vehicle, the co-driver must cross the timing line on foot, during their correct arrival minute, and declare their in-time at the clock sign. Failure to do so will result in an early or late penalty.

K. Parc Ferme

1. Competitors may be required by the organizer to report to the Parc Ferme no sooner than 12 hours before the event.
2. Vehicles may leave Parc Ferme only under their own power.
3. Repairs or refueling in Parc Ferme is prohibited.
4. If the organizers of an event consider that a car is so defective that there may be a risk that the normal road traffic may be affected the car must be repaired in the presence of a rally official. The minutes needed for repair will be penalized the same as late minutes on a transit section. If the competitor cannot present the car in a road worthy condition to the Main Time Control during proper starting minute a new starting minute will be assigned to keep the competitor from trying to regain the minutes lost. An additional penalty will be incured for the minutes late at the Main Time Control.
5. Leaking fuel systems must be repaired in the presence of a rally official. The minutes needed for repair will be penalized the same as late minutes on a transit section.

12.9 Penalties

The following penalties will apply on all SCCA National PRO Rallies:

A. 1 second for each second taken to traverse a stage

B. 1 minute for each minute early or late at a Start, Route or Main Time Control

C. 2 minutes for starting a stage before the starter has given the signal to "GO"

D. 1 minute for every mile per hour over 5 mph above the speed limit.
E. 5 minutes and/or discipline per section 15.3 for unreasonable delay of another competitor on a stage road.
F. 5 minutes for initial traffic citation, exclusion for additional citation.
G. Exclusion, at the discretion of the SCCA PRO Rally Series Chief Steward, for open alcoholic beverages in any vehicle connected with the event.
H. 10 minutes or exclusion, at the discretion of the SCCA PRO Rally Series Chief Steward, for refusing reasonable directions from a rally official.
I. 1 minute of "MPL" (Maximum Permitted Lateness) will be accumulated for each whole minute of late arrival at a Main time or Start Control and for each whole minute taken in excess of the lateness (or "bogey") time listed in the route book for each stage. MPL cannot be reduced by early arrival at controls. The MPL for each section of the rally will be 30 minutes. More than 30 minutes MPL will cause a competitor to be disqualified.
J. 1 minute of "MPE" (Maximum Permitted Earliness) will be accumulated for each minute of early arrival at a Main Time or Start Control. MPE cannot be gained on stages and cannot be reduced by late arrival at controls. The MPE for the entire rally will be 10 minutes. More than 10 minutes MPE will cause a competitor to be disqualified.

The event organizer has the right to correct whole-minute timing errors.

All official timing and penalties shall be recorded in Minutes and Seconds. Scores shall be displayed in Hours, Minutes, and Seconds and total scores shall be posted in Hours, Minutes, and Seconds.

12.10 Course Opening and Closing

Each National PRO Rally shall employ a minimum of one course opening vehicle to precede the first competitor on the route by approximately thirty minutes (or less). *NO* competition vehicle will be allowed to begin any special

stage before the course opening vehicle has cleared the stage and declared it open for competition.

Every PRO Rally Series Event shall also utilize at least one sweep vehicle for the purpose of control closing. Another vehicle(s) must be assigned to aid competitors.

12.11 Force Majeure

While event organizers have an obligation, as far as is reasonable, to ensure every competitor shall encounter equal course conditions and equal likelihood of hazard. incidents often occur which are beyond the organizer's control. When a competitor encounters such a hazzard and receives additional penalty time, it is bad luck. The obstruction is "Force Majeure".

Such unexpected obstructions are generally the result of three conditions: 1) Conditions of Force Majeure, 2) Conditions created by competition error, 3) Conditions created by organizer error.

Claims arising from conditions created (3) organizer error, may be allowed and may be subject to unilateral action by the organizer. Claims arising form conditions of (1) Force Majeure or (2) Competitor error, are not to be allowed and are not subject to unilateral action by the organizer.

This Article is intended as a general guideline and does not deny the competitor's right to submit claims per the PRO Rally Rules, or deny the organizer's right to extend the event's Maximum Permitted Lateness in an effort to ensure a qualified finishing field.

12.12 Service Crews and Servicing

Servicing is defined as either any repair or maintenance of a competing vehicle by any individual other than the driver or co-driver; OR repairs or maintenance of a competing car by the driver and/or co-driver using items not carried in the competing car.

A. Servicing is only allowed at the times and locations designated in the Route Book. Servicing at other locations on or off the route is forbidden. (This is not intended to exclude normal refueling performed by a regular service station attendant.)

B. Each service vehicle and all members of the service crew must register with the organizer and sign the SCCA Waiver and Release. Service Vehicle identification, corresponding to the competition vehicle or vehicles, must be placed on the right front door of the Service Vehicle. Servicing by unregistered people is not permitted.

C. Service vehicles are required to carry a fire extinguisher in accordance with Section 9. Any time service is being performed the fire extinguisher must be out of the service vehicle, readily available. During refueling one crew member shall have the fire extinguisher in hand in close proximity to the refueling procedure.

D. Jack stands must be used when car is not resting on its wheels.

E. Service vehicles must follow their designated route and stop at all Observation Controls encountered. Failure to do so will result in a penalty to the corresponding competition car or cars per the penalty in section 12.8.B.4.

F. Service Crews' conduct during the event is the responsibility of the corresponding competition car or cars. All regulations governing the event, as far as they are applicable, will apply to Service Crews and Service Vehicles. Any penalties arising from Service Crew behavior will be applied to the score of the corresponding competition car or cars.

12.13 Emergency Procedures

Flares or reflective triangles, per the supplemental regulations, are to be set out at a minimum of 20 yards toward approaching rally traffic any time a vehicle is stopped on a stage, even to change a tire. They are to remain in place until the vehicle is removed from the area and must be removed at this time. Flares must be extinguished when the vehicle is removed and the road is clear.

In the event of serious injuries the competitors are to display the Red Cross Symbol, found inside the back cover of the route book, and following competitors are required to stop and render aid. If the crew is physically unable to

display the Red Cross Symbol, i.e. trapped in the car, and no symbol or triangle is visible, the following crew must assume help is necessary and is required to stop.

The driver of any vehicle involved in a rally related accident resulting in personal injury or property damage must obtain an SCCA Accident Report Form from the SCCA PRO Rally Series Cheif Steward and file it within ten (10) days with the SCCA National Office.

Failure to post warning devices, misuse of the Red Cross, failure to stop if the Red Cross Symbol is displayed, or failure to file an accident report is reason for immediate exclusion from the event and/or possible reprimand from the SCCA PRO Rally Series Chief Steward, per section 15 of these Rules.

12.14 Vehicle Impound

The first place vehicle in the Production, Production GT, and Group A classes will be impounded for inspection at he conclusion of the event. Other vehicles may be selected by the SCCA PRO Rally National Steward. Competitors will be disqualified if:

A. they fail to follow the impound instructions of the Series Chief Steward

or

B. the vehicle is found to be illegal.

The competitor shall be responsible for performing the disassembly, reassembly and resulting expense for any inspection to confirm vehicle legality, ordered by the Series Chief Steward.

12.15 Prize Fund and Awards

The *minimum* event prize fund which must be paid to competitors at each event shall be $5,000.00, exclusive of the manufacturer contingency monies. The total event prize fund shall be distributed on the basis of the following formula:

30%—paid on the basis of overall finish position
20%—paid on the basis of finish position in Open Class
20%—paid on the basis of finish position in Standard Production Class

20%—paid on the basis of finish position in Production GT Class

10%—paid on any basis selected by the event organizers

Awards (trophies, plaques, etc.) must be given to at least the top five places or 10% of the starting field.

Group A cars will be included in the Overall finishing position prize fund and will have their own prize fund apart from the overall purse. This separate prize fund will be provided by the SCCA or a suitable sponsor.

12.16 Results

Official results, on the SCCA PRO Rally Results form, shall be mailed to all entrants, both driver an co-driver and the SCCA Rally Office within 15 days of the event. These results must include a break down of leg-by-leg results in addition to totals, for all contestants, finishers and non-finishers, as well as finishing position. Results must also include a designation between Open, Standard Production, Production GT, and Group A vehicles for finishers and non-finishers.

Complete provisional control-by-control scores shall be posted for all finishers not more than two hours after the arrival time of the last finisher at the last control.

Once the results have been properly declared official they may not be changed, even if an error should later be discovered.

13. CLAIMS

The right to file a claim lies with any competitor who may consider himself agrieved by any decision, act or omission of an organizer, official, competitor, or any other person connected with the event. The Series Chief Steward may also file a "class action" claim for any violation of the National PRO Rally Rules or the Rules for Organizers.

All claims shall be settled by a three member committee, consisting of the Series Chief Steward (or his designated authority) and two other members, selected by him. It is recommended that members of the Claims Committee be selected from the following groups, in the priority listed:

PRO Rally Board Members, PRO Rally Board Advisors, Divisional Stewards, Competitors and Others. The Steward shall act as Chairman of the Claims Committee.

The Series Chief Steward shall also choose two alternates to serve on the Claims Committee. These alternates are to substitute in case of the unavailability of, or involvement in a claim by, a designated Claims Committee member. In the event that the Steward files a claim, he must appoint a temporary Chairman, and excuse himself from the Committee while the claim is being resolved. The Steward, the Claims Committee members and the alternates all shall be announced prior to the start of the event.

Claims must be submitted to the Series Chief Steward on the official SCCA Claim Form and be accompanied by a $50.00 fee, in cash, per item. The fee may be returned if the claim was submitted in good faith, regardless of its disposition. All decisions of the Claims Committee shall be reduced to writing and a copy of the written answer will be given to the claimant.

A. Claims Against the Conduct of the Event:

Claims submitted for situations arising on the route or control procedures must be submitted within 30 minutes of the contestant's in time at the final Main Time Control. Claims prompted by the posting of provisional scores shall be submitted within thirty (30) minutes of the posting of those scores and must be based on information contained in those scores.

B. Claims Against Competitors:

Claims submitted *against the actions of another competitor* must be submitted within one hour of the contestant's in time at the final Main Time Control.

A claim *against the legality of a competition vehicle* shall be lodged no later than the close of scrutineering. the Series Chief Steward may extend this time in exceptional cases where the competitor can demonstrate that evidence pertinent to the claim was not available within the time limit.

Failure by the entrant of a claimed vehicle to allow an inspection of that vehicle shall result in immediate disqualification from the event.

C. Claims Within the Production and Group A Classes:

The claimed competitor shall be notified of the claim and be given the option to change to the Open Class before the start of the event. Any vehicle found by the Claims Committee to be in violation of Appendix A (Production Classes) or The Sporting code Appendix J and "Article 255—Specific Regulations for Group A" in the Federation Internationale de l'Automobile year book (Group A) shall be disqualified. The burden of proof of violation of Appendix A or Appendix J will lie with the claimant. If disassembly is required to rule on a claim, the Series Chief Steward will require the claimant to post a cash bond sufficient to cover the total expense of the disassembly, inspection and reassembly.

If, upon inspection, the vehicle is found to conform to Appendix A (Production Classes) or Appendix J (Group A) the claimant shall forfeit the bond which shall be used to cover the cost incurred by the entrant of the claimed vehicle.

If the vehicle is found to be in violation of Appendix A (Production Classes) or Appendix J (Group A) the claimant's bond shall be returned and the entrant of the claimed vehicle will be reponsible for all expenses incurred.

If a vehicle has its Production or Group A class eligibility protested and then does not finish the event, the claim is moot and will be nullified.

14. APPEALS

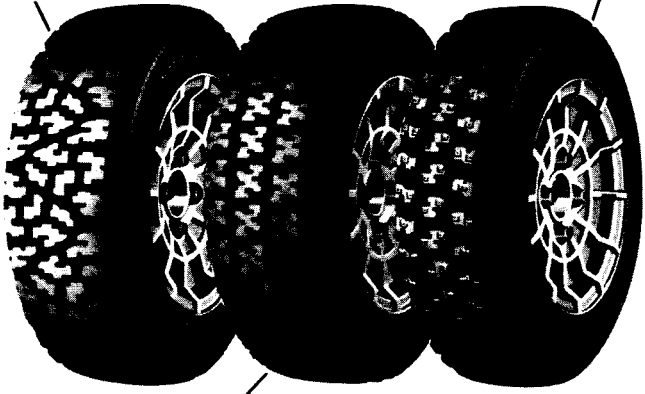
Any organizer, official, entrant, or competitor shall have the right to appeal any decision or penalty rendered by the Claims Committee.

A written notice of intention to appeal must be given to the Series Chief Steward within thirty (30) minutes of the

Three race-proven Potenzas from Bridgestone

*RE41R. For use on paved, good and normal dirt roads. Sizes: 175SR13 (overall diam. 24.1", overall width 7.2") and 175SR14 (overall diam. 25.1", overall width 7.1").**

*RE39R. For ice and snow. "Ice compound" formula, open pattern. Size: 175SR14 (overall diam. 25.2", overall width 6.8").**



*RE38R. For use in sand, mud and dirt. Sizes: 175SR13 (overall diam. 24.1", overall width 7") and 175SR14 (overall diam. 25.1", overall width 7.2").**

** All sizes measured using 5" rim.*

800-525-1662
In California: 800-527-7800. Call Bridgestone's toll-free Race Line.

and an offer to rally about.

Now for the first time in the U.S., Bridgestone Potenza Rally Radials are available for SCCA Pro-Rally license holders. These are professional competition tires, and they come with an appropriate contingency offer.

Race-proven in international competition, the Potenza Rally series provides rally-specific features like sidewall guards (two outboard, one inboard) and rim guards to prevent mud and gravel infiltration of the rim seal. We've selected three different patterns to meet specific U.S. rally conditions.

Talk tech and order by phone. For specifications and applications, talk to the Bridgestone Motor Sports Department on our toll-free Race Line. They can also get you shipping costs, arrange delivery and give you details on our contingency program.

Again, please, competition license holders only — these are D.O.T. — approved *competition* tires. That's the reason for our special price: $46 for 13″ sizes and $51 for 14″. (Sales tax and shipping cost extra.)

See you at the finish line.

BRIDGESTONE

announcement of the decision of the Claims Committee. A written notice of appeal, and including an appeal fee of $200.00, shall be received by the SCCA PRO Rally office within ten (10) days after the announcement of the Claims Committee's decision. An appeal may be withdrawn without penalty only with the approval of the PRO Rally office.

Appeals will be heard by a Court of Appeals appointed by the PRO Rally Series Chief Steward. The Steward will chair the Court and will select two other members to consider the merits of the appeal. The Court of Appeals will render a final decision within ten (10) days of the receipt of the written appeal.

Appeals that are upheld may alter the offical results of an event but will *NOT* affect the disposition of cash awards and trophies already presented by the event's organizers.

Decisions made by the Court of Appeals shall be in writing and shall specify the disposition of the appeal fee which may be forfeited if the Court of Appeals does not find for the appellant.

15. CONDUCT OF CONTESTANTS

15.1 Required Conduct

Every contestant shall conduct himself in a gentlemanly and sportsmanlike manner at all times during an SCCA National PRO Rally in his dealings with the public, with other contestants and with member of the rally committee.

15.2 Charges

Any contestant charged with an offense under this Article shall be fully appraised of the charges and afforded an opportunity to answer them in writing to the PRO Rally Series Chief Steward.

15.3 Discipline

Any contestant so charged who in the PRO Rally Series Chief Steward's judgment is guilty of ungentlemanly or unsportsmanlike conduct or other reprehensible behavior

shall be disciplined by the Steward. Discipline shall take such of the following forms as the Steward may deem to be commensurate with the nature and gravity of the offense:

A. A private letter of warning shall be written by the PRO Rally Series Chief Steward to the offending contestant setting forth his breach or breaches of conduct and cautioning him that any further act detrimental to the best interests of the sport will result in sterner disciplinary action; or

B. A letter of censure shall be issued, with or without notice to the SCCA membership, setting forth his breach or breaches of conduct and censuring him for conduct detrimental to the best interest of the sport. Any further offense of the same or similar nature shall automatically result in his disqualification from further participation in SCCA PRO Rallies for a period of one year from the date of the latest offense and in forfeiture of his standing in the championship competition for that year; or

C. Suspension from the SCCA PRO Rally program up to a period of one year from the date of the offense; or

D. The PRO Rally Office shall recommend to the Board of Directors that the offender be dropped from membership in SCCA for gross misconduct detrimental to the interests of the Club.

16. ANNUAL NATIONAL PRO RALLY SERIES CHAMPIONSHIPS

16.1 Driver and Co-Driver

Each year the SCCA shall recognize overall National PRO Rally Series Championships in two categories which shall be known as Driver and Co-Driver. In addition, competitors in the Production Classes and Group A shall also be eligible for separate Championships for Drivers and Co-Drivers. The National PRO Rally Series Championships shall be determined on the basis of points earned in the best

seven (7) sanctioned events competitors enter and are classified as starters if there are nine (9) or ten (10) sanctioned events, or the best six (6) sancitoned events if there are seven (7) or eight (8) sanctioned events.

In case of ties in final point standings, they will be resolved according to each competitor's record of first-place finishes, then if necessary, the number of second-place finishes, then if necessary, the number of third-place finishes, and so on, down to 10th position. All events entered will be considered for tie breakers.

Points shall be awarded to both Driver and Co-Driver of each starting vehicle based on the vehicle's overall finishing position as follows:

First	20 points
Second	15 points
Third	12 points
Fourth	10 points
Fifth	8 points
Sixth	6 points
Seventh	4 points
Eighth	3 points
Ninth	2 points
Tenth	1 point

Competitors in the production classes and in Group A will also receive points earned for separate championships based on their finishing position within class. The same points system will be used to calculate standings in these championships: i.e., 1st Standard Production receives 20 points; 2nd Standard Produciton, 15 points, etc.—1st Production GT receives 20 points; 2nd Production GT, 15 points; etc.

Points earned in one category or class are not transferable to any other category or class. Contestants who are not regular or spouse members of the SCCA or who do not finish the event will be awarded no points. The PRO Rally Administrator shall annually determine the number of na-

tional awards to be presented to the National PRO Rally competitors in each category and class and the place and time of the annual awards ceremony.

16.2 Manufacturer

There shall be competitions for all automobile manufactures, domestic and foreign, in National PRO Rallies for Overall, Standard Production, Production GT and Group A classifications. The winners shall be the marques compiling the highest total points. National PRO Rally Manufacturer points shall be scored 20, 15, 12, 10, 8, 6, in overall, production, production GT and Group A classes except that only the best-placed car of each marque shall receive points.

Manufacturer's Championships shall be determined on the basis of points earned on all SCCA National PRO Rallies.

In case of ties in final point standings, they will be resolved according to each marque's record of first-place finishes, then, if necessary, the number of second-place finishes, then, if necessary, the number of third place finishes, and so on, down through sixth place.

17. NORTH AMERICAN RALLY CUP

This competition is designed to stimulate international competition between Canada and the United States. Events counting for this cup must be Canadian or SCCA National Championship events listed on the FIA International Rally calendar for the current year. The Rally Regulations governing each Championship and Series shall apply to the respective events. Competitors shall be properly licensed and scoring is as follows:

A. The driver and co-driver shall receive equal points.

B. Competitors shall score their scores of their best four finish positions of events in the home country plus their best two finish positions in the second country between January 1 and December 31. To win the Championship, competitors must count at least one event run in the second country.

C. Cup points shall be awarded per the following schedule:

First	20 points
Second	15 points
Third	12 points
Fourth	10 points
Fifth	8 points
Sixth	6 points
Seventh	4 points
Eighth	3 points
Ninth	2 points
Tenth	1 points

D. In the case of a tie for the first position in the Driver's and Co-Driver's Cup, the total points earned shall be used to determine their position, the higher number of points earned taking the winning positions.

E. Points earned in one category, driver versus co-driver shall not be transferable to the other category.

F. Competitors shall not switch duties in the vehicle from that stated on the official entry form once the competition has begun so as to unfairly earn points in the other category.

17.2 North American Rally Cup for Manufacturers

This Cup for Manufacturers is designed to stimulate interest in and support of rallies by manufacturers.

A. If the winning make of automobile is not manufactured in North America, the Cup will be received by the appointed distributor or agent.

B. A manufacturer will receive the number of points earned by the highest overall placing automobile of that make per the schedule in 17.1C above in all events qualifying per 17.1.

C. The vehicle need not be the same model or year to be considered the same, i.e. the Cup will determine the make of automobile winning the most points such as Ford versus Chevrolet not Ford Capri versus Ford Escort, etc.

APPENDIX A

PRODUCTION CLASSES

DEFINITION

The purpose of the production classes is to provide an opportunity for rallyists to compete in SCCA National PRO Rallies utilizing automobiles whose preparation is limited to improving their safety and reliability. There shall be no guarantee or commitment that cars selected for the production classes will be recognized beyond the current year, or that all eligible vehicles can, or will, be equally competitive.

AUTOMOBILE ELIGIBILITY

Unless otherwise stated in the PRO Rally Rules, cars selected shall be standard models as sold in the U.S. A "model" is a basic manufacturer's designation (e.g. Volkswagon Rabbit, Chevrolet Chevette, Datsun 510, etc.(. A model may include more than one body style (e.g. 2-door, 4-door, etc.) unless specified in these Rules. Selected cars shall be the current model year and previous five model years. No updating or backdating of cars, models, and/or components is permitted. Additions or deletions of automobiles shall be at the discretion of the SCCA PRO Rally Series Chief Steward.

Vehicles titled as "assembled" or "shopmade" are permitted; however, the competitor must declare the model year of the vehicle and said vehicle must have all the components and must meet all the Production Class Rules for that model year. The Vehicle Identificaiton number for the vehicle must be permanently affixed to he vehicle either as a manufacturer's VIN Plate or as the assembled title number stamped in the firewall and the roll cage. Production Class eligibility lists are a separate appendix to these Rules and are available from the Rally Department, SCCA National Office.

SAFETY EQUIPMENT

All cars must be equipped with the safety equipment required for Open Class cars and must pass the same safety inspection. Roll cages must be contained entirely within the driver/passenger compartment,

except for the extension of bracing used to reinforce suspension mounting points as permitted in Section 9. "Suspension". Roll cage bracing is also allowed to extend through the rear of the cab of a pickup truck.

SHOP MANUAL AND SPECIFICATION FORM

Each entrant must have an official factory shop manual for his vehicle and present same at scrutineering. The manual must also be made available in case of any inspections or claims.

Each entrant must file a completed "Production Class Specification Form" for the Model Year of the vehicle to be used in the event. Specification forms are available from the Rally Department, SCCA National Office.

The Specification Form must be filed with the SCCA PRO Rally Series Chief Steward prior to the start of event scrutineering. Specification Forms must be current, and all vehicle modifications to the original factory specifications must be noted on the Specification Form (i.e., different radiator, alternator, etc.). Specification Forms will become part of the permanent file maintained by the SCCA PRO Rally Series Chief Steward and will be available for public inspection. It is not necessary to file a new Specification Form for every event if the permanent file contains the currrent specifications.

First time entrants, who have not previously filed a Production Class Specification Form, may have the option of using the information from a file copy (if available) for the Model Year of their vehicle to complete the form prior to start of scrutineering.

Failure to file a Specification Form with the PRO Rally Series Chief Steward prior to start of scrutineering will result in the competitor being moved to the Open Class for that event.

The Production Class Specification Form will be used as the source of information for vehicle inspections. In case of conflict between the Specification Form and the official factory shop manual, the official factory shop manual will take precedence.

VEHICLE PREPARATION

The only work authorized is normal maintenance or the replacement of parts damaged through wear or accident and the modifications

explicitly authorized hereafter. Except for what is explicitly authorized, any part damaged through wear or accident may only be replaced by an OEM part identical to the one damaged. All original equipment must be intact, unmodified and functioning according to the manufacturer's specifications unless modifications are specifically authorized in the following paragraphs. Original equipment, as defined, is an item of standard or optional equipment that could have been ordered with the car, installed on the factory production line, and delivered through a dealer in the United States. Dealer-installed options, except as required by factory directives, no matter how common, are not included in this definition.

AUTHORIZED MODIFICATIONS

All items which are not specifically allowed or referred to as "free" in this section must be of original manufacturer's specification. Minor changes (such as a hole in the firewall, etc.), resulting from authorized modifications, are permissable.

1. Lighting Devices

All lighting and signaling devices must comply with the legal requirements of the state or province of registration.

Freedom is granted with regard to the headlight frontal glass, the reflector and the bulbs. The mounting of not more than four additional headlights is authorized. A headlight shall be considered as any lighting device throwing a beam toward the front (dipped-beam, long-range lamp, anti-fog lamp). The fitting of reverse-lights is authorized provided they will only switch on when reverse gear is engaged.

The mounting of maneuverable search-lights is prohibited.

2. Cooling System

If, for the same model, radiators of different capacities are normally offered, they may be used. The addition of a radiator screen is authorized. The make and type of thermostat are free.

A single engine oil cooler and necessary fittings may be added.

3. Induction

The carburetor(s) or fuel injection normally mounted on the recognized model may not be changed or removed. The elements which control the quantity of fuel fed into the engine may be changed, but not those which control the quantity of air. Any emission control device, external to the basic engine, may be removed or rendered inoperative. Such alterations must not allow any additional air to be inducted to the eingine (i.e., The removal of a vacuum hose from the air cleaner housing requires the capping off of the hole in the air cleaner housing). The boost is free on Turbo-equipped vehicles.

4. Exhaust

The exhaust system is free, except that the stock exhaust manifold(s) must be retained, the pipe(s) must exit behind the driver and external to the body, and the noise level must not exceed 86 dba when measured at 50 feet to the left of the vehicle during stationary engine run-up to 4000rpm, momentary hold and closed throttle return to idle.

5. Electrical Equipment

The original battery and alternator may be replaced by another commercial automobile unit of equal or larger capacity provided the location remains unchanged. The make is free.

6. Gearbox

If, for the same model, different gearboxes are normally offered, they may be used.

7. Final Drive

If, for the same model, different final drive ratios are normally offered, they may be used. The use of limited slip differential units is prohibited in Standard Production Class vehicles unless offered by the manufacturer as original OEM equipment. Limited slip differential units are allowed for use in Production GT Class vehicles.

8. Shock Absorbers

The make and type are free. However, no addition is allowed and neither their original purpose nor their number may be modified. The original supports may be reinforced but not otherwise modified.

9. Suspension

The standard suspension components and mounting points may be reinforced. The material and dimensions of the spring are free except that it must be located in the standard position and fit the standard mounting points. The standard spring mounting points may be reinforced. The roll cage may be used to brace the vehicle's suspension.

MacPherson Strut or similar suspensions:

1. Inserts are free
2. The entire strut housing is free provided the original mounting points, suspension angles, dimensions and all possible adjustments are identical to the original. The material must be comparable.
3. Springs must mount in the original position and must not be adjustable.

10. Wheels and Tires

Wheels and tires are free so long as the wheels do not exceed 6" in width or the stock width whichever is greater. They must bolt to the standard bolt pattern, and fit under the coachwork without modification. The use of adapter plates is forbidden unless they are OEM equipment. Tires must be DOT approved, grooving is legal. Mud flaps of flexible material, which do not improve the aerodynamics of the vehicle, may be added both in front of and behind the tires and must be installed for all drive and rear wheels.

11. Brakes

The replacement of worn linings is authorized and their system of attachment is free, provided the dimensions of the friction surface remain unchanged. The material of the linings is free.

Servo-assistance and pressure lining valves are only permitted when standard or a manufacturer's regular production option for the model. If servo-assistance is standard, the servo device may be disconnected and removed. Rerouting of brakes and fuel lines is permitted. Fuel lines which pass through the passenger compartment must be of the "Aeroquip" type.

12. Clutch and Pressure Plate with Flywheel

The material and method of attachment of the clutch linings are free. These units are free except that the flywheel must be of the same material as offered from the manufacturer and fall within the specified minimum weight.

13. Fuel Cells

Fuel cells, not to exceed the capacity of the stock fuel tank, or 15 gallons (whichever is greater), are allowed to replace stock fuel tanks. Location is free. Fitting of such cells must conform to item 9.L - Scrutineering.

14. Motor Mounts

Motor mounts are free so long as the stock location for the mounts for the engine and transmissions, and the locations of the engine and transmission unit, are not affected.

15. Supplementary Accessories

Supplementary accessories are authorized without restriction provided they have no influence whatsoever on the behavior of the car, such as those concerning the aesthetics or the inside comfort (lighting, heating, radio, etc.), or those enabling easier or safer driving of the car (speed pilot, windshield washer, etc.) provided they do not affect, even indirectly the performance of the engine, the steering, the transmission, the road holding or handling characteristics of the vehicle.

The following is authorized.

a. Nuts and bolts may be freely exchanged and locked by any means.

b. The mounting of additional gauges, meters, etc.
c. The horn may be changed or an extra one added—at the disposal of the co-driver if wished.
d. Extra relays, switches, wiring, and fuses may be added to the electrics.
e. The original accelerator cable may be replaced by another one whether supplied or not by the manufacturer.
f. The luggage boot may be adapted for better accommodation of the equipment carried (straps for fixing of a tool box, additional spare wheel, etc.). The attachment system of the original spare wheel may be altered. Space Saver spares may be replaced with standard tires.
g. Filler caps may be locked by any means.
h. The steering wheel is free.
i. The addition of protection for the engine sump, transmission, fuel tank and all fluid lines is permitted.
j. Cruise control systems may be removed.
k. Anti-theft systems may be removed.

16. Coachwork

None of the normal elements of the coachwork (dashboard, all inside quiltings, whatever their location), and none of the accessories normally mounted by the manufacturer may be removed or replaced. However, the modifications authorized in the preceding paragraphs, such as those necessitated by the addition of a windshield washer (drilling of a hole into the hood) will be allowed.

Transparent parts must, in case of damage, be replaced by others identical in all aspects to the original one.

Carpets and their associated padding may be removed.

The front seat(s) may be replaced with any suitable seat(s).

Standard seat/shoulder belts may be removed. The glove box door may be removed or replaced.

17. Consumable Items

The replacement of normally consumable items (oil filters, air filters, spark plugs, fan belts, etc.) with others of equivalent OEM specifications is permitted. Spark plug heat range is free.

18. Tolerances

All adjustment/machining must be at the manufacturer's specification and/or within the manufacturer's specified tolerances. Overboring for the use of oversize pistons is prohibited.

19. Canadian Vehicles

Canadian Production Class Vehicles prepared to CASC specifications will be allowed to compete in SCCA PRO Rally Production Classes in 1985 only provided the entered vehicle is included on the PRO Rally Production Class Eligibility List. Vehicles must comply with Article 9. Scrutineering and Article 7.8 Vehicle Identification. Batteries may be mounted according to CASC specifications.

APPENDIX B

Group A

Group A eligibility is determined by Articles 251, 252, 253 and 255 of Appendix J to the current FIA International Sporting Code. The FIA International Sporting Code is available from:

Aztex Corporation
P.O. Box 50046
Tucson, Arizona 85703

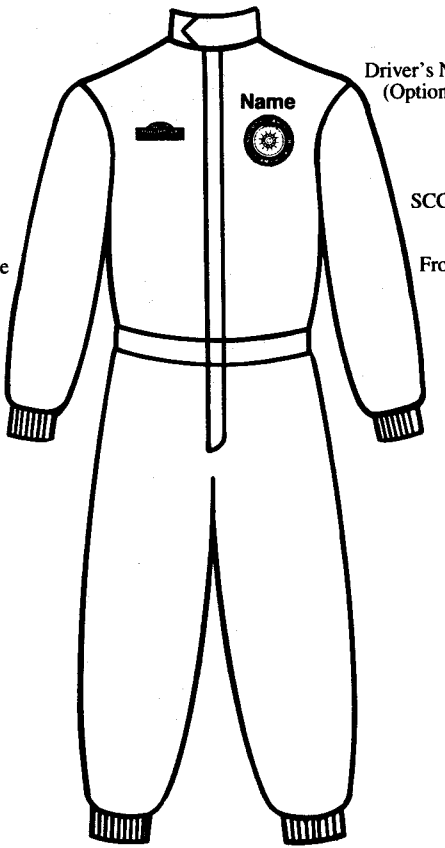
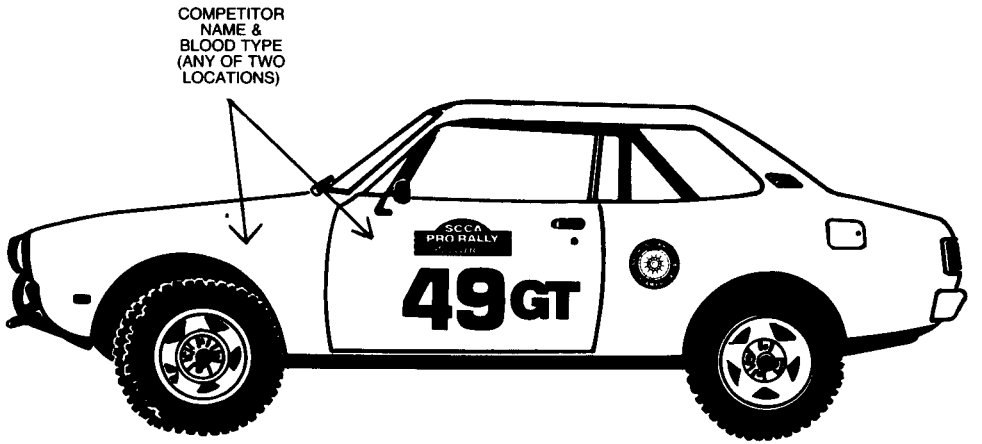
VEHICLE AND DRIVING SUIT IDENTIFICATION





CAR NUMBER DECAL ARRANGEMENT

8" Wire Wheel Decal may be placed in any visible location
Name and bloodtype may be placed in any of the two locations show

APPENDIX Y

OCCUPANT RESTRAINT SYSTEMS

All vehicles in SCCA-sanctioned PRO Rallies must be equipped with a four-, five- or six-point restraint harness meeting the specifications below for both the driver and co-driver. These restraints must be worn at all times during the competition.

1. Six-Point System

A six-point system is recommended for use in all automobiles and is required in those automobiles in which the seating position is semi-reclining (seat back angle exceeds 35 degrees from vertical). It consists of a lap belt, a shoulder harness and two leg or anti-submarine belts. The minimum width on all portions of the system is two (2) inches.

2. Five-Point System

A five-point system is permitted for use in vehicles with upright seating. It consists of a lap belt, a shoulder harness and a single anti-submarine belt. The width of the lap belt is three (3) inches where it contacts the body and two (2) inches for the remainder of the system.

3. Four-Point System

A four-point system is permitted for use in vehicles with upright seating. It consists of a lap belt and a shoulder harness. The width of the lap belt is three (3) inches where it contacts the body and two (2) inches for the remainder of the system.

4. Material

The material of all straps shall be nylon or dacron polyester in perfect condition. The buckle must be metal-to-metal quick release type.

5. Shoulder Harness

The shoulder harness shall be a two-strap over-the-shoulder type. There shall be a single release common to the lap belt and shoulder harness. Only completely separate upper shoulder straps are permitted.

The shoulder harness angle to the first structural point of support shall not be below a line drawn perpendicular to the seat back from the top of the occupant's shoulder. If the seat does not provide lateral restraint, the mounting point on the vehicle structure shall be at least 18 inches behind the seat back when measured along the belt.

6. Lap Belts

The lap belt angle shall be between vertical and 45 degrees.

7. Anti-Submarine Strap

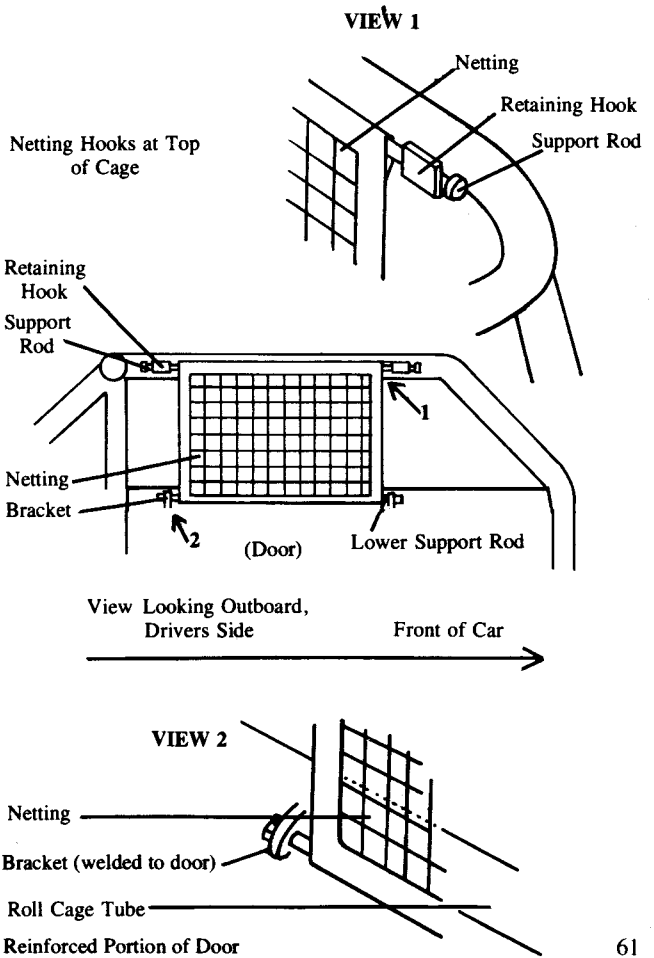
The double leg straps of the six-point system may be attached to the vehicle structure or to the lap belt so that the occupant sits on them, passing them up between his legs and attaching them with metal-to-metal connection to the single release common to the lap belt and shoulder harness. Alternately, it is permissible, but not recommended, to attach the leg straps to the floor forward of the seat cushion.

The single anti-submarine strap of the five-point system shall be attached to the floor structure of the car and have a metal-to-metal connection with the single release common to the seat belt and shoulder harness.

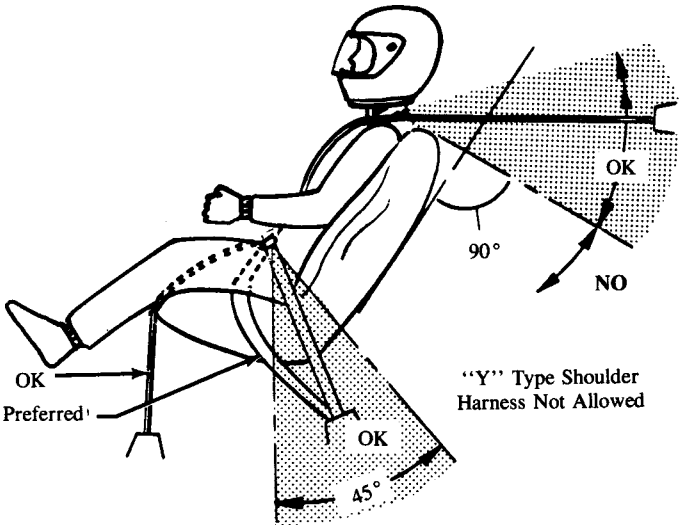
8. Mounts

All mounts must be capable of withstanding at least a 3,000-pound dynamic load without failure. In cases where reinforcing plates are used on thin sheet metal, such as the floor, they must be securely attached to the sheet metal to prevent a "can opener" type failure of the mount. Weave through (ladder type) brackets must not be subjected to a bending load. All bolts must be ⅜-inch diameter SAE Grade 5 or better.

PROPER WINDOW NET INSTALLATION



PROPER RESTRAINT HARNESS INSTALLATION



Note: Anti submarine belts not required unless seat is reclined more than 35° from vertical

OK

APPENDIX Z

ROLLOVER PROTECTION

These specifications are mandatory and represent minimum requirements. Specific installations are subject to approval by the Chief Scrutineer at each event.

Roll cages are required in all vehicles. For roll cages not constructed to FIA specifications, the following specifications are mandatory and represent minimum requirements. Specific installations are subject to approval by the Chief Scrutineer at each event.

A. Basic Design Considerations

1. The basic purpose of the roll cage is to protect the occupants if the car turns over or is involved in a serious accident. This purpose should not be forgotten.
2. The main roll cage hoop must extend the full width of the driver/co-driver compartment and must be a minimum of two inches above the top of the occupant's helmets when sitting in the normal position, or as near the roof as practical in closed cars. It shall not be more than ten (10) inches behind the driver/co-driver.
3. The roll cage must be designed to withstand compression forces resulting from the weight of the car coming down on the roll structure, and to take fore-and-aft loads resulting from the car skidding along the ground on the roll structure.

B. Material

1. The roll cage hoop and all braces must be seamless, ERW, or DOM steel tubing. Either mild steel or chrome molybdenum alloy steel such as SAE 4125 or SAE 4130 is permitted. It is recommended that mild steel tubing be used as chromium alloys present difficulties in welding and must be normalized to relieve stress. Proof of the use of alloy steel will be the responsibility of the entrant.

2. For the purpose of determining tubing sizes, the vehicle weight is without occupants. The minimum size of the tubing shall be determined as follows:

Vehicle Rally Weight	ROLL CAGE	
	Mild Steel	Alloy Steel
Under 2500#	1.50 x .120	1.38 x .090
2500# or over	1.75 x .120	1.625 x .090

3. An inspection hole of at least ⅛-inch diameter must be provided in a non-critical area of the main hoop to facilitate verification of wall thickness.
4. Where bolts and nuts or other fasteners are used, they shall be at least ⅜-inch diameter SAE Grade 5 or equivalent quality.

C. Fabrication

1. One continuous length of tubing must be used for the main hoop member with smooth continuous bends and no evidence of crimping or wall failure.
2. All welding must be of highest possible quality with full penetration. Arc welding, particularly heliarc, should be used wherever possible. The welds should be inspected by magnaflux or die penetrant after fabrication. Alloy steel must be normalized after welding.

D. Bracing

1. Two fore-aft braces made of tubing at least equal to that required for the main hoop are required. Diagonal lateral bracing to prevent distortion of the hoop is recommended but not required.
2. The fore-aft bracing must be attached as near as possible to the top of the hoop but not more than six (6) inches below the top of the hoop and at an included angle of at least 30 degrees.

E. Mounting

1. Roll cages and braces must be attached to the frame of the car wherever possible. Mounting plates, regardless of whether welded or bolted to the frame, must be at least 3/16 inch thick.

2. In the case of cars with unitized or frameless construction, or cars with frames where frame mounting is impractical, mounting plates must be used to secure the roll cage structure to the structure of the car. The important consideration is that the load be distributed over as large an area as possible.

   Mounting plates bolted to the structure shall not be less than 3/16 inch thick with a back-up plate of equal size and thickness on the opposite side of the panel with the plates through bolted together using at least 3 bolts.

   Mounting plates welded to the structure shall not be less than .080 inch thick. Wherever possible, the mounting plate should extend onto a vertical section of the structure, such as a door pillar.

F. Padding

Except where forward or side vision is affected, any portion of the roll structure which might be contacted by the driver/co-driver's helmet shall be covered with energy absorbing material (high density) to a minimum thickness of ½ inch. The energy absorbing material must be covered by protective wrapping. (Styrofoam and Ensolite are examples of energy absorbing padding.)

G. Removable Roll Cages and Braces

Removable roll cages and braces must be carefully designed to be at least as strong as a permanent installation. Removable connections must be a type approved by SCCA. The approved types are shown in Figures 1 thru 6. Figures 2 thru 6 are only approved for use in bracing and not for the basic frame of the roll cage.

H. Roll Cage

1. It is required that all cars utilize a roll cage type of construction. A cage not only provides improved safety but also minimizes body distortion in case of an accident.

2. The main roll hoop must be as specified in Section A2. A similar hoop must be in front, supporting the roof and front pillars with horizontal bars connecting the front hoop to the main hoop at each side of the top. Alternately, the front hoop may be constructed by using two side hoops which follow up the front pillars to the roof and then aft to attach to the main hoop. These two side hoops are connected by a tube over the top of the windshield. Figures 7 & 8 depict these two types of construction. The material of the forward portion of the cage shall be at least 1.50 x .120 inches mild steel or 1.38 x .090 inches alloy steel.

I. Other Designs

Roll cages of alternate material or design may be accepted by the Chief Scrutineer upon presentation of certified data verifying the installation is able to withstand three simultaneously applied loads.

1.5 G Lateral
5.5 G Fore and Aft
7.5 G Vertical

The induced loads being carried over into the primary structure. The use of non-ferrous material is prohibited.

1977 British Leyland Motors, Inc. (Triumph)

SCCA PRO RALLY LIFETIME STANDINGS

The following standings, compiled by SCCA Archivist Harry M. Handley, are based on an individual's placings in the first six overall position (worth 100, 80, 60, 50, 40 and 30 points respectively) on all 127 SCCA-sanctioned National Pro Rallies conducted in the 12 years from 1973, when the SCCA National Pro Rally Series for the United States Championship was established, through 1984. A total of 390 individuals have thus far gained life points — 153 as Drivers only, 221 as Co-Drivers only, and 16 in both roles. The 80 people listed below (including 1 in both roles) represent 21% of those with any life points, and have gained 65% of the "top 6" placings (980 of 1502), 72% of the life points (65240 of 90300) and 90% of all "wins" (227 of 252).

Figures at left of names indicate rank within role; stars (i.e.: "8*" or "*" etc.) indicate Annual Overall Champion; figures in parentheses indicate number of 1st Overall event placings, or "wins".

GRAND MASTER (2000 or more points) [5]

Drivers [3]				Co-Drivers [2]			
1 John Buffum	8*	(43)	5640	1 Doug Shepherd	4*	(27)	4100
